1.
Lower the tailgate. Remove the center bolt using a 13MM wrench and loosen the other two.

Note: Bedliner panel may have to be removed.

2.
Slightly lift the handle and insert the POP&LOCK aligning the threaded clip with the center bolt hole.
3.
Insert the 1/4-20 hex head bolt into the POP&LOCK and tighten. Push the handle all the way up and tighten the two mounting screws.

Note: Do not over-tighten screws.

Install the one-way screw in place of the hex head bolt for added security.

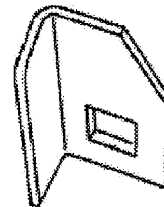

Some trucks have handles that are mounted slightly lower in respect to the bezel which can cause the key to be difficult to remove after locking the unit. To alleviate this problem, modify the cam of the lock as shown below.

Unscrew the cam from the lock and clamp in a vice.

Tighten an adjustable wrench over the tip of the cam and bend it 10 - 30 degrees to provide more clearance.

Readjust if necessary.

NOTE: POP&LOCK is designed to secure the passenger side latch. You may experience that the drive side latch can open due to the flex in the handle, but the tailgate will still remain locked.
